Blockchain & Web3:

- **Development:** Solidity, Hardhat, Smart Contract Deployment & Testing
- **Web3 Integration:** Ethers.js, Web3.js, Wallet Integration, Contract Interaction
- **Concepts:** DeFi, On-chain Transactions, ERC-20/ERC-721 Standards

PROJECTS

Onchain SIP – Decentralized Investment Platform

- Tech Stack: Solidity, Hardhat, React.js, Node.js, Ethers.js, Web3.js
- Built an on-chain Systematic Investment Plan (SIP) platform enabling automated decentralized investments
- Integrated wallet authentication and smart contract execution for transparent asset management

Auradesk – Private Desktop UI for Multimodal AI

- Tech Stack: Svelte.js, Node.js, Docker, Ollama, TypeScript, Python, REST APIs, LLMs
- Built a local AI assistant interface supporting multimodal LLMs with vision and chat capabilities
- Integrated local models via Ollama with support for RAG, STT, TTS, and web search APIs

ZeroHour – Emergency Response CLI Tool

- Tech Stack: Python, Shell scripting, CLI-based automation, API integration
- Developed a command-line tool for rapid emergency data reporting and coordination workflows
- Enabled efficient incident reporting and retrieval for crisis response scenarios

INTERNSHIP

• Full Stack Developer Intern – Zecser LLP Developed scalable full-stack applications and integrated APIs with optimized databases.	(5 Months)
• MERN Stack Developer Intern – Ziuke Built and optimized full-stack features using MERN stack technologies.	(8 Months)
• Frontend Developer Intern – Edunet Foundation Developed responsive UI components for web applications.	(30 Days)
